

CKO Packages

We have divided our compliance packages into three simple classes.

Rather than basing them on any one scheme, we will be able to advise you on the package that suits you best. The variations also depend on the type and class of vehicle you want to fit for example the kit we recommend may vary between LGV's and HGV's and the accessories you require will differ depending on whether your fleet is made up of rigid or articulated; long or short wheel base etc

Most compliance schemes are not yet compulsory but whether operating out of, or driving in, the UK, Ireland or the rest of Europe the expectation of additional road safety equipment is becoming more prevalent.

At CKO we also believe that the major real benefit to recordable devices on your vehicles is the ability to defend against claims and/or get your vehicle back on the road after an incident in the shortest possible time. Trucks in depot's waiting on insurance investigations are not earning money.

Elementary/ Basic – the minimum requirements to meet most vehicle safety standards

Advanced – gives much more control to the driver in reducing road user risk

Comprehensive – gives much more control to the transport manager and ensures evidence is recorded both live and for later inspection

For illustration purposes only

Basic	Advanced	Comprehensive
Left turn alarm AVSMCLH14	Left turn alarm AVSMCLH14	Left turn alarm AVSMCLH14
Reversing alarm (night silent) AVR85-3	Reversing alarm (night silent) AVR85-3	Reversing alarm (night silent) AVR85-3
7" monitor AHD-MON C10-2	7" monitor AHD-MON C10-2	7" monitor AHD-MON C10-2

Reversing camera AHD-RCAM 210	Reversing camera AHD-RCAM 210	Reversing camera AHD-RCAM 210
