## ALM-MULTI-01 Multiple Vocal Message Warning Alarm

ALM-MULTI-01

### PRODUCT OVERVIEW

The ALM-MULTI-01 is a versatile warning alarm designed to enhance road safety by providing vocal warnings for vehicle manoeuvres (turning left, turning right, and reversing). It alerts pedestrians, cyclists, and other road users, making them aware of your movements, significantly reducing the risk of accidents.

This all-in-one device offers three distinct warning messages, each controlled by a separate wire. Rather than buying three separate alarms for left, right, and reverse, you can use multiple units of this single alarm, integrating them seamlessly to meet your requirements. This simplifies the purchasing process and makes installation more efficient.

Please note that the alarm needs to be installed at the relevant position on your vehicle. If it is intended as a reverse alarm, it must be installed at the rear of the vehicle.

### SPECIFICATIONS

**IP Rating:** IP68

**Rated Voltage:** 12/24V DC

**Certifications:** ECE R10 UKCA

**Sound pressure:** 97dB +/-4dB

**Dimensions:** 104 x 68 x 60mm
