

Product Specification

ALM-WNB-01 Selectable White Noise / Beep

ALM-WNB-01

PRODUCT OVERVIEW

The ALM-WNB-01 warning alarm is a multifaceted and dependable product, designed to keep vulnerable road users safe by alerting them to the movements of your vehicle. This advanced alarm offers two selectable sound modes: a "Beep Beep" alert or a white noise option. The adjustable audio levels let you customise the volume, and a night silent feature automatically reduces sound during unsociable hours to minimise noise disturbances.

Engineered specifically for mounting at the rear of your vehicle, the device serves as a critical alert system to warn when your vehicle is reversing or manoeuvring. The ideal choice for reducing accidents and improving awareness wherever you operate.
